GitHub : github.com/Deepak17kb

Email : deepak7521@gmail.com

Mobile : +91 9827703699

TECHNICAL & PROFESSIONAL SKILLS

Languages : Python, SQL, C++, Java, JavaScript

Frameworks & Web : Node.js, Express.js, React, REST APIs, HTML5, CSS3

Data & Analytics : Power BI, Tableau, Advanced Excel, DAX, Power Query, MS SQL Server, MongoDB

Developer Tools : Git, GitHub, Visual Studio Code, Jupyter Notebook

Professional Skills : Dashboard Reporting, Data Storytelling, Business Requirements, Team Collaboration, Data Validation

PROJECTS

KrishiMitra AI Assistant Platform | *Node.js, Express.js, Gemini API, JavaScript, REST APIs* May 2026

- Integrated **4+ REST APIs** (Gemini AI, weather services, geolocation, government open data) to deliver automated crop advisories, precipitation forecasts, and daily commodity market prices.
- Engineered a **Node.js and Express backend** using **Gemini Pro** prompt optimization, reaching **92% response accuracy** and sub-800ms latency for pest diagnostics and crop disease treatments.
- Developed front-end modules for **crop calendars, yield tracking**, and state agriculture programs in a responsive web app, reducing network payload by **35%** to optimize mobile load times.

Live Demo : krishi-mitra-silk-nine.vercel.app

Global Jobs Hiring Analytics Dashboard | *Power BI, DAX, Power Query, Data Modeling, ETL* Feb 2026

- Built a **3-page analytical dashboard** evaluating **100K+ job records** across 15 industries, converting raw employment figures into structured salary benchmarks and remote work adoption reports.
- Automated data extraction and ingestion via **Power Query** to cut refresh load times by **40%**, authoring 12 custom DAX measures for median salaries, department headcounts, and annual growth.
- Designed a star-schema data model with interactive cross-filters and slicers to isolate compensation variance across roles and experience tiers without latency on composite data tables.

GitHub Repository : github.com/Deepak17kb/Global-Jobs-Hiring-Analytics

LifeLine | Transit Routing & Emergency Simulator | *C++, React, REST APIs, Graph Algorithms* Feb 2026

- Modeled a spatial graph network across a **40-location, 83-road grid** to compute detour alternatives, traffic bottlenecks, and multi-vehicle dispatch paths during municipal road disruptions.
- Implemented **10+ algorithms from scratch**, including Dijkstra, A*, Bellman-Ford, Floyd-Warshall, Edmonds-Karp, and Tarjan's SCC to traverse directed cyclic graphs and optimize shortest paths.
- Developed a full-stack monitoring application with a **React client** and a **C++17 REST backend**, confirming reliable query throughput and zero execution failures across **96 unit test cases**.

Live Demo : lifeline-31iq.onrender.com

TRAINING & VIRTUAL EXPERIENCE

DSA Placement Bootcamp — Lovely Professional University Jun 2026 – Aug 2026

Data Structures & Algorithms Specialization

- Implemented 150+ algorithmic solutions in C++ covering trees, recursion tables, and graph traversals, validating computational correctness across sparse networks and boundary test cases.
- Profiled runtime complexity and memory usage using asymptotic Big-O notation, refactoring array search operations and heap allocations to lower peak memory usage by **25%**.
- Formulated custom hash tables and binary search routines to enforce linear time complexity and prevent key collisions across high-volume competitive programming test distributions.

Deloitte — Data Analytics Job Simulation Dec 2025 – Feb 2026

Virtual Experience Program Participant | Forage

- Audited a **10,000-row transaction ledger** using data profiling, identifying **15+ billing anomalies**, duplicate invoice records, and unauthorized charges across client enterprise accounts.
- Cleaned, structured, and validated raw transactional records using **Microsoft Excel** functions (VLOOKUP, INDEX/MATCH, Pivot Tables), establishing **100% schema integrity** for audit reporting.
- Constructed interactive dashboards in **Power BI and Tableau** to categorize financial risk tiers, delivering drill-through visual scorecards and KPI charts to guide stakeholder decisions.

CERTIFICATIONS

Oracle Agentic AI Certified Foundations Associate | [Oracle Verification](#) Sep 2026

Database Management System — Part 1 & 2 (Relational Data & SQL) | [Infosys Springboard](#) Jun 2026

Oracle Data Platform 2025 Certified Foundations Associate | [Oracle Verification](#) May 2026

ACHIEVEMENTS

Winner (Best Pipeline), TransOrg AgentIQ Datathon Sep 2026

Top 10 Finalist, CodeXtreme 4.0 — Java Coding Contest (LPU & iamneo) Mar 2026

Recipient, Letter of Appreciation — “Pariksha Pe Charcha”, PMO India Jul 2022

EDUCATION

Lovely Professional University Phagwara, Punjab

Bachelor of Technology, Computer Science and Engineering | **CGPA: 8.34** Aug 2024 – Present

Kendriya Vidyalaya No. 1, Bhubaneswar Bhubaneswar, Odisha

Senior Secondary Examination (Class XII) | **Score: 81%** Apr 2023 – Apr 2024
